PROFESSIONAL SUMMARY

Full Stack Software Engineer with hands-on experience building scalable web applications using React, Next.js, TypeScript, Python, Flask, and REST APIs. Experienced in developing full-stack SaaS applications, e-commerce platforms. Familiar with System Design, software architecture principles, database design, and modern development workflows. Skilled in leveraging AI tools to accelerate software development, prompt engineering, debugging, documentation, and code generation. Passionate about building performant, maintainable, and user-focused applications.

WORK EXPERIENCE

Front-End Developer Intern – October 2024 to May 2025

Medway Teb Pouyan Company – Tehran

- Designed and developed scalable full-stack web applications using Python, Flask, Next.js, React, and TypeScript.
- Engineered and executed ETL pipelines to migrate legacy CRM data into a centralized customer management platform while ensuring data integrity.
- Authored comprehensive User Requirements Specifications (URS) and created detailed test cases to support quality assurance and system validation.
- Independently developed and deployed the company's production website (Luster) from end to end.
- Built responsive and user-friendly interfaces following modern UI/UX and responsive design principles.
- Designed backend architecture, RESTful APIs, and database schemas for scalable web applications.
- Developed and integrated REST APIs connecting customer portals with backend services and third-party CRM systems.
- Optimized SQL queries, database structures, and normalization to improve the performance of medical equipment distribution records.
- Implemented SEO, Answer Engine Optimization (AEO), and Generative Engine Optimization (GEO) strategies to improve search visibility and AI search discoverability.
- Collaborated with stakeholders to translate business requirements into scalable technical solutions.

PROJECTS

Project: Luster Corporate Website

Technologies: React.js, Next.js, TypeScript, Flask, Docker

Developed a production-ready responsive web application with reusable UI components and REST API integration.

Optimized SEO and Core Web Vitals, implemented responsive layouts, improved loading performance, and containerized the development environment using Docker.

Project: Personal Finance & Budget Management Platform

Technologies: Next.js • React • TypeScript • Flask • REST API

Description:

- Developed a full-stack budgeting platform for tracking income, expenses, and financial goals.
- Built secure RESTful APIs for financial data management.
- Designed responsive dashboards and data visualization.
- Implemented CRUD operations and state management.
- Integrated backend and frontend with optimized API communication.

Project: Modern E-Commerce Website

Technologies: Next.js • React • TypeScript

Description:

- Developed a responsive e-commerce frontend.
- Built reusable UI components.
- Implemented product filtering and search.

TECHNICAL SKILLS

Programming Languages

- Python
- JavaScript (ES6+)
- TypeScript

Frontend Development

- React.js
- Next.js
- Responsive Web Design
- UI Development

Backend Development

- Flask
- RESTful API Development
- Authentication
- CRUD Operations

Databases

- Database Normalization
- Query Optimization
- Data Modeling
- Data Cleansing

Software Engineering

- System Design
- REST API Design
- Technical Documentation
- URS
- Test Case Design

Tools

- Git & Github
- Postman
- Figma
- Docker

EDUCATION

Bachelor of Computer Engineering

Relevant Courses: Software Engineering, Database, Web Programming, Data Structures, Algorithms

Islamic Azad University, Karaj Branch
